
RAVIN BHAKTA

Fremont CA | 510-755-7264 | ravin.bhakta@gmail.com

WWW: [Personal Website](#)

Summary

Full-stack software engineer with a strong focus on designing and implementing scalable distributed systems. Adept at transforming stakeholder requirements into effective technical solutions that enhance operational efficiency. Committed to software design principles and continuous improvement, with extensive experience in RESTful APIs, cloud integrations, and test-driven development. Innovative software architect with expertise in RESTful API design, microservices architecture, and cloud services. Proven ability to deliver scalable solutions and drive system integration that enhances operational efficiency.

Technical Expertise

- Ruby on Rails and Ruby
- React library
- Microservices architecture
- SQL database management
- Azure cloud services
- Pub/sub patterns
- Test-driven development
- Git and SVN proficiency
- System testing methodologies
- Technical communication skills
- JavaScript and Node.js
- RESTful API design
- Database management
- Docker and Kubernetes
- Event-driven design
- Software design principles
- Version control systems
- Debugging techniques
- Code modernization practices

Experience

COFOUNDER | 01/2026 - Current

Stealth Startup - Santa Clara, California

- Co-founding and architecting a stealth-stage software platform focused on API-driven systems and backend infrastructure
- Conducted research in the field of Artificial Intelligence to stay up-to-date with the latest advancements.
- Led projects to enhance machine learning frameworks and improve performance efficiency.
- Created and maintained corporate website, marketing materials, and social media accounts.

INDEPENDENT SOFTWARE ENGINEER (FREELANCE /SALES CONSULTANT | 06/2025 - Current

Self-Employed - Fremont, California

- Developed innovative AI algorithms for data analysis and predictive modeling.
- Collaborated with cross-functional teams to integrate AI solutions into existing systems.
- Conducted code reviews to ensure quality and maintainability of AI applications.

- Researched emerging technologies to incorporate into software development projects.

OPERATIONS ASSOCIATE APPLICATIONS DEVELOPER | 07/2021 - 06/2025

Blue Shield of California

- Researched emerging technologies to identify opportunities for AI advancements.
- Developed and maintained software applications for diverse client needs.
- Configured and maintained system settings for optimal performance and reliability.
- Collaborated with cross-functional teams to implement software updates and enhancements.

SOFTWARE DEVELOPER | 09/2019 - 07/2021

Entappia

- Designed and implemented RESTful APIs applying service-oriented architecture principles, enabling seamless integration with third-party services and improving platform extensibility
- Integrated SAP Open Connectors with distributed cloud databases (Firebase, Amazon DynamoDB) to establish resilient data pipelines, enhancing data accessibility and reliability.
- Designed and implemented scalable software solutions for diverse client needs.
- Led cross-functional teams to enhance software development processes and methodologies.

QUALITY ASSURANCE INTERN | 09/2018 - 05/2019

Los Angeles Housing Authority

- Applied testing methodologies to verify system correctness during development, ensuring quality and reducing production issues
- Revamped applicant/tenant portal using ASP.NET MVC, Entity Framework, Kendo UI, and SQL Server, ensuring maintainability through software design principles
- Migrated data storage architecture from XML to C# with SQL Server, enhancing processing speed through systematic problem-solving

Education

California State University - Los Angeles, CA | Bachelor of Science

Computer Science

Website

github.com/bhaktaravin, ravinbhaktaresume.com

Continuous Learning And Certifications

- Machine Learning Specialization (Stanford Online/Coursera), Supervised Learning, Unsupervised Learning, Advanced Algorithms
- Actively studying distributed systems fundamentals, event sourcing, pub/sub patterns, and service-oriented architecture best practices.
- Self-directed learning in software design principles, system architecture, and test-driven development methodologies.
